

### Electronic Gold Testers

These testers are used by the government to reliably test on site jewelry stores and factories. Electronic Gold Testers do away with the problems involved with basic acid gold testing. By making use of advanced microprocessing, these mini computers analyze gold content by using a special testing gel. Simply place the sample piece in the provided alligator clip and apply the testing gel and within seconds its karat will be determined by the tester.

#### GXL-18

52-520-XL

The popular and sophisticated GXL-18 will test accurately from 6K to 18K and display its reading on the LCD readout window. Rotary type sensor uses easily replaced gel cartridges. Comes complete with microprocessor, rotary sensor, testing plate, marking eraser, scratching file, sensor cleaner and carrying case. Requires 2 9V batteries (included).

#### 24-Pro

52-520-24

Same as the GXL-18, except the 24-Pro will test the full range from 6K to 24K. Includes microprocessor, rotary sensor, testing plate, marking eraser, scratching file, sensor cleaner and carrying case. Requires 2 9V batteries (included).

#### Replacement Parts:

- GXL-18 Refill – 52-520-2
- Sensor GXL-18 – 52-520-3
- 24-Pro Refill – 52-520-10
- Sensor 24-Pro – 52-520-4

### Acid Gold Testing Kit

52-522

Our StarLeaf Gold testing equipment makes gold testing fast, simple and precise. Our solutions come already pre-mixed to the individual karat. The set includes test solutions, plumb karat needles, a test stone and a beautifully finished acid-resistant wooden box.

### Accessories:

- 52-524-02 – 4 Needle Set (10, 14, 18 & Silver)
- 52-524-06 – 10K Test Acid
- 52-524-07 – 14K Test Acid
- 52-524-08 – 18K Test Acid
- 52-524-09 – 22K Test Acid (Part A & Part B)

- 52-524-10 – Silver Test Acid
- 52-524-11 – Platinum Test Acid (Part A & Part B)
- 52-524-12 – Test Stone 2 1/4" x 1 1/4" (64 x 38mm)
- 52-521-1 – Glass Acid Bottles

52-524-12

52-524-02

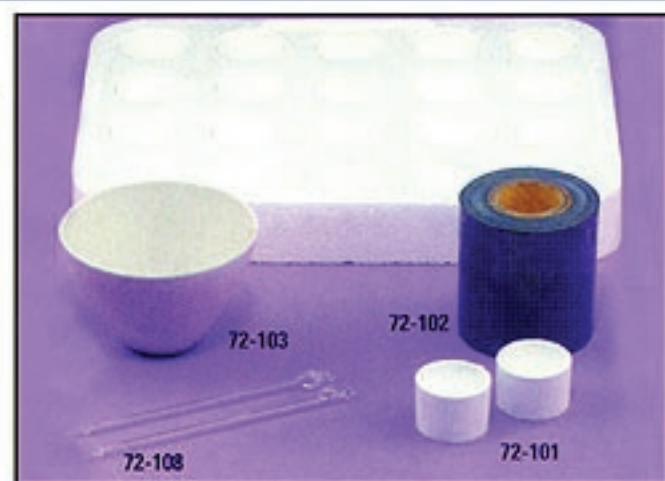

### StarLeaf Assaying Supplies

Assaying is the most accurate and economical way of testing the purity of gold. Accurate down to 1 part in 10,000.

- 72-101 – Cupels-1 1/4" (38mm)-100 pcs per box
- 72-102 – Lead Foil-5lb roll (2.2kg)
- 72-103 – Crucibles-4" (102mm)
- 72-108 – Sampling Tubes-6" length (152mm)
- 15-860 – Assayer's Tongs
