

Digital Imaging

Taking your own photographs has never been so simple and affordable. Now you can produce your own brochures and catalogues in-house. You can update your website yourself, e-mail pictures to customers, take your own appraisal photographs, create slideshows and keep track of your inventory.

The Box Imaging System

54-105

This unique and easy to use imaging system features:

- Electronically controlled individual lighting (top, sides, back, front and platform)
- Lighted motorized platform, panning 180° and tilt 30°
- Allows you to position your camera 90° from top and front face.
- Top halogen light to enhance diamond sparkle
- Includes software

ImageDome Lighting System

54-114-1

Professional quality lighting system will give you the custom lighting you need to photograph your jewelry. The ImageDome features a multitude of variable lighting options. The adjustable over-head light offers diffused lighting for subtle reflections and a direct light that will produce crisp highlights and illuminate gemstones and diamonds. Two adjustable side lights bounce off the dome to give you any shading and highlighting you desire. The camera position can be positioned from 0° through 87° giving you easy control of the angle you want. Included are fixtures that will hold virtually any item. Holding and adjusting jewelry to the right position is quick and easy. Four interchangeable reflection surfaces can be used to achieve different lighting effects and quick-change magnification filters (4X, 7X and 10X) can be used to obtain close-up shots. Software, operating manual and instructional videotape are included.
