BenchMate™ Work-Holding System for Jewelers

The BenchMate is a powerful holding system that aids in stone setting, soldering and jewelry repair. Special attachments turn the BenchMate into a variety of helpful tools. The basic BenchMate holder tilts and rotates to any position while you work. The holder moves freely in all directions or you can add selective resistance by tightening the pivot knobs, it moves only when and where you want.

The Basic BenchMate Package includes:

- Basic BenchMate holder
- Shellac pad
- Fixed mounting plate
- Hardware

The Deluxe BenchMate Package includes everything in the Basic Package plus:

- Narrow and wide solder fingers
- Third-hand attachment
- Bench pin kit

Basic BenchMate – 51-110

Deluxe BenchMate – 51-111

Optional Engraving Shelf – 51-110-1

Ring Size Cutter

27-060

Simplify ring sizing by quickly removing an exact amount of ring shank. The cut is always parallel and precisely to size so soldering is neat and fast, the entire process takes less than 10 seconds. You'll never have an uneven or wrong size cut and by removing a single piece of ring shank there is no lost gold from sawing or filing. Includes 7 cutters from USA size 1/4 to 2, in 1/4 size increments.

Metric model also available.
